

FRESH AIR

WP 2: Developing capacity for implementation science

Objectives

- To provide training and education to policy makers, researchers and other stakeholders to increase capacity and demand for research using implementation science.
- To provide methodological support for WP leads, country leads and other project participants.
- To undertake cost-effectiveness evaluation of interventions.

Tasks

- Develop and deliver capacity building in implementation science to key stakeholders
- Provide methodological support for WPs
- Undertake cost-effectiveness reviews

Lead

Professor Jim Stout (UW)

Jim is an expert in implementation science and improvement science. He has managed large international research projects.
